

## SANDWICH PANEL

Sandwich panel metal surfaces consist of the composition of core steel sheet, galvanized and organic coating. Especially organic coating does better against corrosion, and thus it extends the life-span of the material. The metal surface thickness of the sandwich panel that facing outwards depending on the type and the degree of the corrosion.

UNIDOOR is specialized in ISO-Thermal industrial doors and semi-insulated industrial doors using Italian components and hardware. UNIDOOR cares to constitute the ultimate quality products manufactured of Italian components and hardware following the European standards to exceed our clients' expectations.

VAST is a Lebanese company that entered the local market in 2011, harnessing an outstanding work team with more than 25 years of experience.

From the very beginning, we made a clear choice to enter the competition arena, and have a clear footprint among a great number of older companies. All of this has been possible thanks to our serious work, perseverance, determination, punctuality, and commitment to agreements in their slightest details, as well as a constant and minutely follow-up on the latest technologies and inventions around the world.

Right from the start, the company management has always strived to create a unique modern idea, based on building exceptional relationships, rooted in great mutual loyalty, and relying on a true sense of partnership among managers, employees, clients and providers. Indeed, we do believe that outstanding results and excellence are not to be achieved through the efforts of only one person. Instead, they are the outcome of great efforts provided by each and every member of our company, and of our strive to choose the most exceptional providers around the globe. This is how we are able to meet, altogether, our clients' best expectations, with the products and services that we provide.

This is also how we create a great sense of mutual loyalty, by guaranteeing our clients' success. Then, we can finally rest assured that our clients are faithful to us, and that we, in turn, have succeeded, and can persevere throughout the years, if not generations.
